

## AGH-10T

## GENERAL DESCRIPTION

AGH Series armored guard houses are designed especially for defense industries that have a threat of terrorist attack, vehicle attack or high security required places border, police station, military area, ministries, and government buildings, etc. If there is a threat of terrorist attack in addition to the control of personal access in high-security applications, armored guard houses are the unique solution and the most secure systems. Even though the attack is from terrorists with B7 class, it's not possible to damage guard members. Also, these guard houses have B7 Class Bullet Proof.

## SPECIFICATIONS

- Both for room and tower, all glasses, sides, floor and top are armored to B7 level. Armor grade B7 is tested and certified by internationally recognized third party laboratories.
- Room Dimensions (without Tower): 236cm height, 225cm width, 285cm length (can be designed and changed upon request).
