

## SECURITY SYSTEMS | V200-E TRIPOD TURNSTILE

### V200-E

## GENERAL DESCRIPTION

Optima V200-E provides aesthetic and effective control of entry or exit at kinds of toll collection systems like train/ metro stations, and access control for commercial centers, stadiums, schools, government, and private sector buildings, etc.

## SYSTEM SPECIFICATIONS

| MODELS                                          | V200-E                                                                                      |
|-------------------------------------------------|---------------------------------------------------------------------------------------------|
| Cabinet                                         | AISI 304-Grade stainless steel main body, arm, top cover and rotor                          |
| Maintenance                                     | Top cover is removable for easy maintenance.                                                |
| Direction Control                               | Maintained by Optima Control card                                                           |
| During Operation                                | Low power consumption and silent running                                                    |
| Self-centering design                           | Enables the arms to stand at the correct position at every turn                             |
| Mechanism                                       | Electro-mechanical mechanism                                                                |
| Usage Area                                      | Suitable for indoor use                                                                     |
| Environmental Conditions and Power Requirements | Between -15 °C and +65 °C, 95% non-condensing humidity; 220 V +/- 10%, mono phase, 50-60 Hz |

## SECURITY SYSTEMS | V200-E TRIPOD TURNSTILE

### ACCESSORIES

|                                                                                                                             |                                                                                    |
|-----------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------|
| SCADA or any control system: It is possible to change and check the position of turnstile with touch screen control panel * | Optima Cloud. To control turnstile by mobile devices (ios-android), computer, etc* |
| Motor-driven mechanism *                                                                                                    | Uninterrupted power supply (UPS) *                                                 |
| Anti-panic dropping arms *                                                                                                  | Sound signaling device (buzzer) *                                                  |
| Alarm sensor to detect crawling under the arms and jumping over the arms *                                                  | Coin mechanism and coins *                                                         |
| Stainless steel railing *                                                                                                   | Push button box *                                                                  |
| Digital counter *                                                                                                           |                                                                                    |

(Accessories marked with (\*) are optional.)
